Custom Development Solutions

Connecting people, processes, and information for increased productivity and more informed business decisions. Sterlite brings extensive knowledge and best practices around improving application development productivity and effectiveness. We accelerate organizational maturity at all levels, with proven techniques that focus on improving process, building staff competencies and expanding knowledge capital, with specific areas of focus at each level of maturity defined by the CMMI®.

Sterlite has a well-defined and mature application development process which comprises the complete SDLC from business case analysis to warranty support of the application. This process supports a distributed delivery environment wherein work responsibilities can be effectively divided between the delivery teams spread across the globe. Each of the development phases can be defined with metrics and subsequently tracked with the web based tools which can be used by our customers.

Our application development methodology can be used for:
➢ New application development
➢ Existing application enhancement
➢ Application consolidation
➢ Application migration

Our unique value proposition lies in our ability to:
➢ Use global our delivery model for application development
➢ Knowledge acquisition and retention
➢ Use our matrix organization structure for using the required expertise
➢ Track the SLAs norms using web tools which are transparent even to our customers

Most of our development projects are built on web based technologies with a strong orientation towards standards-driven architecture such as EJB and COM/ DCOM. We have been addressing the service needs of industry verticals such as banking, financial services, insurance, telecom etc.

Our development process, supported by our Multi-site™ onsite-offshore development methodology shortens the application development timeframes providing significant business benefits to our customers.

ORACLE®
PARTNERNETWORK

Sterlite is a certified Oracle Gold partner and an SBA 8a Certified Minority business.

"Sterlite built our solution supporting 3 lines of business and distinctive product lines. Their solution is supporting the functionality our previous vendor was unable to provide and this solution saves us on average $100,000 weekly."

J.T.

"The Sterlite delivery team is the brain power on our largest most critical ATG implementations globally. "

J.M.

"As one of only 2 global training partners Sterlite can provide the scale and depth needed. "

"Sterlite's' cost to deliver our ATG Solution was nearly 30% lower than our previous vendor. They also provided functionality in 30 days which our previous vendor could not perform in 90 days.

We found their knowledge and productivity in migrating data and integration our other enterprise applications with Oracle ATG to be key in driving out cost and improving customer satisfaction."

G.C.
