

Sterlite

Oracle WebCommerce Suite Solutions

Delivering unrivaled value with Oracle Web Commerce Solutions

Assessments

Sterlite has over a decade of experience with the Oracle Commerce platform, which includes ATG and Endeca. We understand their capabilities and limitations and continually perform assessments for our customer partners that include:

- Out of the box product opportunity and requirements match.
- Customer customization assessment.
- Product modification assessment.
- Implementation roadmap and priority.
- Accurate budget forecasting.

Legacy Migrations and Accelerators

Moving data into your Oracle Web Commerce platform.

Sterlite has performed migrations supporting several technical and business needs such as maintaining consistent data. We have mapped dozens of systems to migrate data into the Oracle Web Commerce platform. Migrations and/or accelerators exist for:

- Clarify
- LDAP
- Custom applications .NET
- Custom applications J2EE
- XML
- Excell

Integration Services

Sterlite knows the Oracle Web Commerce platform and whether it's integrations to CRM, ERP, Logistics or other Enterprise Software or Custom systems. Integration is an integral component of having your Web Commerce platform deliver value, save cost and improve the sales and customer experience. Our integration capabilities are deep and broad and include: SAP and Oracle ERP as well as other Enterprise software applications such as Adobe CQ5.

ORACLE®

PARTNERNETWORK

Sterlite is a certified Oracle Gold partner and an SBA 8a Certified Minority business.

"Sterlite built our solution supporting 3 lines of business and distinctive product lines. Their solution is supporting the functionality our previous vendor was unable to provide and this solution saves us on average \$100,000 weekly."

J.T.

"The Sterlite delivery team is the brain power on our largest most critical ATG implementations globally. "

J.M.

"As one of only 2 global training partners Sterlite can provide the scale and depth needed. "

"Sterlite's' cost to deliver our ATG Solution was nearly 30% lower than our previous vendor. They also provided functionality in 30 days which our previous vendor could not perform in 90 days."

"We found their knowledge and productivity in migrating data and integration our other enterprise applications with Oracle ATG to be key in driving out cost and improving customer satisfaction."

G.C.

Advanced Security Capabilities

Sterlite is experienced with helping Business to Government (BtoG) and regulated industries support and provide self-services and Web Commerce solutions to their customers with required advanced security needs. Security is one of our core competency and solution areas, we have been able to apply Web Commerce solutions out of the Oracle platform, where traditional approaches for special security needs were crude and customized silos. Our approach allows for a platform which also services other enterprise needs to be shared and secured.

Managed Infrastructure

Sterlite understands that the Web Commerce platform is mission critical and impacts your business overall. Experience matters in delivering a complete solution for your business. Our proven experience and proven partnered approach in managing the core components that keep your Web Commerce systems available scalable, performing, and resilient to technology failures combines the best in industry platform with the best in the industry secure managed systems and infrastructure talents.

Application Day 2 Services

Sterlite provides services which help customers manage and maintain applications and their data. Items like administration of catalog releases, version management, content administration and data management; all of which can often be a challenge for mid-sized companies. Sterlite's local and global delivery capabilities ensure not just a successful launch for your Web Commerce site but a successful life for weeks, months and years with cost-effective value.

Creative Services

Sterlite has proven partnerships with leaders in the creative and media services areas. We can leverage these partnerships and working frameworks or we can work with your existing creative services firm.
